

Editor/Compiler as author in a book

Winste L and Swartz MN. Pathogenic properties of invading microorganisms, In: Sodeman WA Jr. and Sodeman WA. eds Pathologic Physiology 4th Ed: Mechanism of Disease. Philadelphia. W/B Saunders. 1994:pp 457-472.

Tables

Tables should be type-written on separate numbered pages and should follow the reference list. All tables should be numbered consecutively using Roman numerical. Each must carry a brief description heading. Tables should be planned to fit within print area (190 x 145 mm).

Illustrations

Photographs and photomicrograph should be printed in black and white glossy paper and must be numounte. B- 2 size with good contrast. Figures should be drawn in black ink on thick white paper or card and be submitted in original. Figure number, and name of the first author should be marked lightly on the back of each figure with soft pencil. Legends should be given in a separate page.

Abbreviation

Standard abbreviation should be used whenever possible. The full term for which the abbreviation stands followed by abbreviation in parenthesis should precedes the first use of the abbreviation in the text except for standard units of measurements like 27°C and 25 m. mol/l etc.

Letters to the Editor

Communications with reference to an article published in the journal and current health problems having pathological importance will be accepted as letter to the editor.
